I think that d-link video relay services and sorenson vp-100 video relay services equipment should be compatible with each other. Right now if I use d-link to d-link or sorenson to sorenson you only need to use telephone numbers but to use d-link to sorenson or sorenson to d-link we must know the ip numbers for the people we are trying to contact. This is a real problem that needs to be addressed as soon as possible so that only telephone numbers are needed to make a relay call between d-link and sorenson customers.
